CELVION™

INNOVATION INSPIRED BY NATURE

BAGASSE TABLEWARE & PACKAGING SOLUTIONS

ABOUT CELVION

Pioneering Sustainable Alternatives Since 2012

CELVION is the premium sustainable materials brand of **SNG Eco India Pvt. Ltd.**, built on a vision to create smarter, high-performance alternatives to conventional materials. **Since 2012**, the Group has driven innovation in sustainable materials and **WPC products manufacturing**, combining durability, functionality, and environmental responsibility.

Building on this legacy, CELVION transforms renewable **sugarcane bagasse** into precision-manufactured tableware and packaging — delivering consistent quality, responsible manufacturing, and **reliable performance across India and global markets.**

From Nature
We use sugarcane bagasse, a renewable by-product, to create responsibly designed solutions.

Engineered with Care
Controlled processes and precision manufacturing ensure consistent quality and performance.

Trusted Worldwide
Reliable supply, strict quality standards, and responsible practices built for global partnerships.

OUR DIRECTION

OUR VISION
To lead the shift from plastic to sustainable bagasse solutions without compromising quality.

OUR MISSION
To engineer food-safe bagasse solutions that combine sustainability with global quality standards.

OUR BRAND PROMISE
To deliver sustainable bagasse solutions with uncompromising quality and lasting value.

WHY BAGASSE

A natural, sustainable alternative to single-use plastic — made from sugarcane by-product.

Renewable Resource

A natural by-product of sugarcane juice extraction - no additional cultivation or land use.

100% Compostable

Compostable and biodegradable, replacing single-use plastic across food, industrial, and retail packaging.

Strong & Food-Safe

Sturdy and food-safe for hot and cold food applications, with the strength and protection industrial and retail packaging demands.

Quality & Compliance

Every CELVION product goes through controlled manufacturing and in-house quality inspection before dispatch, covering dimensions, appearance, structural integrity, and production consistency.

Food-Safe Raw Material

Free from harmful additives.

Automated Production

From pulp to finished product, with minimal human intervention and quality checkpoints at every stage.

In-House Quality Testing

At every production stage.

BAGASSE TABLEWARE

Celvion Serve
DURABLE. FUNCTIONAL. SUSTAINABLE.

INDUSTRY REACH

Airports

Designed for efficient food service on the go.

Travel

Convenient meals, made travel-friendly.

Industrial Packaging

Reliable bagasse packaging solutions.

Hospital

Organised, hygienic meal service solutions.

Canteens

Tableware for corporate and institutional dining.

F&B Outlets

Versatile solutions for cafés & takeaways.

Temple

Solutions for prasad distribution & gatherings.

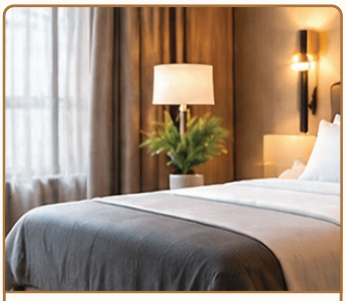

Railway

Tableware for on-board & railway food service.

Catering Services

High-volume solutions for catering & events.

Hotels

Sustainable solutions for hospitality dining.

Schools

For cafeterias, canteens & institutions.

Exhibition & Events

Serving solutions for food counters & events.

SMART PACKAGING

Sustainable Packaging

High-performance plant fibre tableware for restaurants & caterers.

Electronics Packaging

Protective molded-fiber packaging for electronics and hardware.

Medical Packaging

Hygienic packaging for medical and pharmaceutical products.

Cosmetics Packaging

Eco-friendly fibre packaging for cosmetics.

Toys Packaging

Durable sugarcane-fibre packaging designed to protect and present toys.

Retail Packaging

Premium fibre packaging for retail products.

FMCG Packaging

Sustainable packaging for beauty products.

Consumer Packaging

Sustainable fibre packaging solutions for everyday consumer goods.

Customized Packaging

Elegant packaging crafted for luxury brands.

CUSTOMISED PACKAGING

DEVELOPMENT & MANUFACTURING PROCESS

From an initial requirement to production-ready packaging, CELVION works through a structured development process to align product function, material selection, design and manufacturing requirements.

01 REQUIREMENT & APPLICATION

Understand product & market needs.

02 PRODUCT/STRUCTURE DEVELOPMENT

Develop packaging around use & handling.

03 MATERIAL SELECTION

Select suitable sustainable materials.

04 PROTOTYPE & SAMPLING

Create samples for evaluation.

05 TESTING & APPROVAL

Review quality before approval.

06 PRODUCTION

Move approved design into production.

07 QUALITY CONTROL

Inspect packaging for quality & consistency.

08 PACKING & DISPATCH

Pack & prepare for shipment.

A consistent process. Reliable quality. Responsible packaging.

PRODUCTION STRENGTH

From raw sugarcane bagasse to finished product, our Ahmedabad facility runs on automated machinery and strict in-house quality control - built for bulk, export-ready supply.

Key Strengths

- Automated production lines with in house quality testing lab
- Controlled fibre-to-product process, from pulp formation to precision moulding
- Export-grade handling and bulk production capacity, ready for FCL/LCL shipments
- Custom product development for private-label partnerships
- On-time delivery across domestic and export markets

Our Capacity at a Glance

150 MT
Month Production Capacity

150
Dedicated Team

90,000 SQM
Facility Footprint

MANUFACTURING PROCESS

From raw sugarcane bagasse to finished product, every step is carefully controlled to ensure consistent quality, strength and sustainability.

Bagasse Collection

Renewable bagasse sourced from sugar mills.

Pulp Preparation

Bagasse is cleaned, re-pulped and mixed into a uniform slurry.

Pulp Conditioning

Refined for optimal density and strength.

Precision Moulding

The slurry is refined for optimal density and strength.

Forming & Dewatering

Vacuum removes water to form strong, uniform products.

Strength Through Heat

Heated, pressed and dried for lasting strength.

Trimming & Finishing

Trimmed and finished for a clean, refined look.

Quality Inspection

Each product is checked for strength, accuracy and quality.

Packing & Dispatch

Securely packed for domestic and international shipment.
